

Keebz n Cables x HMX Ice Cendol

Last Update: 03/02/2025

Keebs n Cables x HMX Ice Cendol		
Switch Type: Linear		HMX
29	/35	Push Feel
23	/25	Wobble
7	/10	Sound
15	/20	Context
6	/10	Other
80	/100	Total

Notes

Push Feel

Coming with candy green nylon over nylon housings, this latest entry in the ‘Shaved Ice’ series of switches from Keebz n Cables is another banger from HMX that is factory lubed to near perfection. Incredibly smooth throughout the majority of their strokes and with firm, muted, but slightly bouncy housing collisions at both end, there’s hardly much to take away from here. Perhaps one of the only issues to be had with these switches’ push feeling is a slight stickiness or guminess that does show up at bottoming out for some switches in the batch.

Wobble

The Ice Cendol are yet another example of an HMX made switch with basically no practical amounts of stem wobble to them whatsoever. There is only the tiniest budge in the stems of these switches in the N/S and E/W directions.

Sound

The full nylon housings and well factory lubed construction of the Ice Cendol switches makes them sound, well, exactly like you’d expect of an HMX-made switch with those specs. Overall on the more quiet side, these switches are smooth and silent throughout their strokes and capped on either end by bass focused, heavy sounding collisions that are only occasionally accompanied by the stickiness noted in the push feeling notes above.

Context

Priced at \$0.35-0.40 per switch depending on where these are sourced from, these Keebz n Cables collaborations are the cheapest and best entries yet in their ‘Shaved Ice’ series of switches. With plenty of vendors, a decent pricing, and long availability, there’s a good chance that these switches could generate even more attention than their predecessors.

Other

Switch families that are cheap, accessible, and well designed are becoming increasingly rare and Keebz n Cables deserves quite a bit of credit for steering these switches into those categories.
