

## Snow Whites

Last Update: 05/22/2022 (V2)

Snow Whites		
Switch Type: Linear		Durock/JWK
26	/35	Push Feel
14	/25	Wobble
5	/10	Sound
7	/20	Context
3	/10	Other
55	/100	Total

### Notes

#### Push Feel

Introduced as being an ‘all white H1 clone’, these 415Keys’ exclusive switches are decently similar to the classic H1 switches in that they have a similar depth in bottoming out and material based, Durock/JWK smoothness to them. However, the finer details of the H1 switches are missed in the Snow Whites, as there is still *some* prevalent scratch throughout the stroke, some ping to the springs, and a strange ‘poppy’ feeling topping out.

#### Wobble

These are definitely not the poster switches for Durock/JWK in terms of stem wobble. There’s a pretty noticeable amount of wobble in both N/S and E/W directions that also has a sort of plasticky, grinding quality to it that is concerning. This plastic grinding feeling is also especially noted in the slight top housing give in some of the switches in the batch I received.

#### Sound

The sole positive point about this switch is that of the nylon bottoming out which gives a predictable depth to the bottoming out of these switches. There is still, much like with the push feel notes above, some audible scratch, ping, and highly pitched tin topping out sounds due to various details overlooked in designing these switches.

#### Context

The Snow Whites were categorically poor in their execution, marketing, and vendor support. Sold in a bulk, fake “sale” format by a single, unresponsive vendor, 415Keys even went as far to include films with the switches showing that the vendor most certainly never cared about the quality of these switches and was only looking to bank on the reputation of H1 switches.

#### Other

While I despise people openly referring to all JWK switches as “low effort recolors”, this is the one shining example I can’t disagree with. This is unfortunately the pinnacle of the JWK bubble that failed to contribute to anyone’s betterment in the community throughout 2020 and 2021.
