

# Long Hua Platycodon Grandiflorum

Last Update: 01/05/2025

Long Hua Platycodon Grandiflorum		
Switch Type: Tactile		Kailh
26	/35	Push Feel
15	/25	Wobble
6	/10	Sound
10	/20	Context
8	/10	Other
65	/100	<b>Total</b>

## Notes

### Push Feel

The Long Hua Platycodon Grandiflorum are rather strong tactile switches that punch immediately out of the gate with a rounded, medium-high strength tactile bump that is breezed past with a snapping sensation that lands you directly into a somewhat harsh, pointy feeling bottom out. With small, fine grain scratch present all along this journey, these switches are reminiscent of some of the earliest aggressively tactile switches in all of the fun ways. They don't quite make switches like these all that often anymore.

### Wobble

Present more so in the N/S than E/W directions, the Platycodon Grandiflora have pretty noticeable amounts of stem wobble that may bother more users than most. That being said, though, they're still far from unusable or the worst that I've ever seen in switches.

### Sound

Despite being omnipresent in the push feeling of these switches, the scratch takes a back seat in the sound profile of the Grandiflora, with a loud, snappy sounding tactile bump and even louder, sharper sounding bottoming out dominating your ears. While I'm certainly far from a fan of this aesthetic, these certainly do well to represent the 'in your face', aggressive style of tactile switches that some people love.

### Context

These switches, specifically, may be damn near impossible to find as of the time of publishing this scorecard, however their branding as 'Long Hua' switches as well as arrival alongside other Long Hua switches signals the resurgence of one of Kailh's budget brands that I've always historically been a fan of. There's a good chance these are just the start of something new...

### Other

In addition to my joy of the revival of the Long Hua brand as a seemingly more experimental offshoot for Kailh, these also deserve some recognition for an exceedingly unique name...
