

## Attack Shark Green Jelly

Last Update: 01/19/2025

### Attack Shark Green Jelly

Switch Type: Linear		Unknown
25	/35	Push Feel
15	/25	Wobble
3	/10	Sound
10	/20	Context
4	/10	Other
57	/100	<b>Total</b>

### Notes

#### Push Feel

The Attack Shark Green Jelly switches are the latest Attack Shark linears to be released, boasting what is supposed to be improved designs and factory lubrication. To put it lightly both of these things are questionably present, at best, with these switches being incredibly scratchy linears that have a harsh bottoming out onto their stem poles that is wildly inconsistent from switch to switch.

#### Wobble

Despite other recent Attack Shark switches being designed similarly to these switches, the Green Jelly switches have a noticeably greater amount of N/S and E/W stem wobble. Like the 'Push Feel' notes above, switches also seem to vary quite a bit on this metric.

#### Sound

"Variability" is the only word that is needed to really explain the score of these Attack Shark switches. They're scratchy, somewhat pingy, incredibly sharp and nearly clicky at their bottom out, and manage to do so in such fashion that it's basically a surprise with every keystroke as to what you get. The only thing saving them from being lower is that there are plenty of linear switches that do exist with seemingly greater scratch sound than these.

#### Context

While Attack Shark does deserve some credit for offering these switches as aftermarket options outside of their prebuilt keyboard lineup, even at the \$0.30 per switch price point these have a lot of work to be competitive in the keyboard space. The apparent lack of effort in their design leads me to believe that these switches were quickly thrown together and will just as quickly disappear in the grand scheme of things, making their availability questionable at best.

#### Other

For supposedly being an improved version of earlier Attack Shark linear switches, the Green Jelly switches and Attack Shark have a long way to go before being objectively better.
