

Outemu Silent Peach

Last Update: 03/20/2022

Outemu Silent Peach		
Type: Silent Linear		Outemu
24	/35	Push Feel
15	/25	Wobble
5	/10	Sound
10	/20	Context
5	/10	Other
59	/100	Total

Notes

Push Feel

Weighted on the lighter side with a bottoming out force between 40 and 45g, while these switches make half decent linears they don't for all that good of silent linears. On top of the subtle but noticeable scratch, the dampening pads give a slightly mushy feeling bottom out which is reminiscent of older, less refined silent linears even though it is decently firm.

Wobble

While certainly not anywhere near par for the Gazzew branded switches from Outemu, the Silent Peaches have a fairly typical Outemu OEM amount of stem wobble with a noticeable amount in the N/S direction and slightly lesser amount in the E/W. The real loss of points here comes from the fact that somehow the *winglatch top housing still have a slight budge to them*.

Sound

The Outemu Silent Peaches do fairly well in living up to the 'silent' part of the silent linear type as even at high rates of actuation they maintain an extremely quiet profile relative to normal linear switches. That being said, though, the little sound that is produced is scratch-forward throughout the stroke and gummy at both ends of the housing collisions, making what little sound that these switches *do* produce not that pleasant.

Context

The Silent Peaches and associated release partners came out in early 2022 sans really any marketing nor attempt at providing them to vendors outside of more eastward facing sellers. Sitting in an odd gap between 'premium, enthusiast grade' and 'traditional OEM', these switches don't really live up to their price point and will likely not be remembered at all.

Other

Outemu has not made truly winglatch style housings since the days of Gazzew's ICE V1 switches, and for that I am glad at the reappearance of these as an option. However, the execution of the design and especially the stem wobble leaves a lot to be desired, even for OEM Outemu switches.
