

Wingtree 277

Last Update: 01/11/2026

Wingtree 277		
Switch Type: Linear		Wingtree
28	/35	Push Feel
24	/25	Wobble
7	/10	Sound
15	/20	Context
6	/10	Other
80	/100	Total

Notes

Push Feel

The 277s are Wingtree's first custom switch offering produced in collaboration with WJBY and have details that are entirely focused on driving in a smooth, compact, and tight feeling linear switch. While these switches are on the whole incredibly smooth and feature well balanced, firm, and slightly muted housing collisions, the switch to switch lube consistency is a bit spotty causing some switches to feel (and sound) thinner and higher pitched than others.

Wobble

There is only the tiniest amount of N/S and E/W direction stem wobble in these switches. Unlike the factory lubing as well, this is extremely consistent across the entire batch of switches I received.

Sound

Under normal typing speeds, the Wingtree 277s are compact, dense sounding linears with smooth strokes free from scratch and fairly firm, dampened housing collisions. It should be noted, though, that the bottom outs are a bit unbalanced from the topping outs and can come across slightly thinner and more pointy sounding – something which is exacerbated in the cases mentioned above where less precise factory lubing persists.

Context

Priced at \$0.35 per switch and available from quite a few vendors, these are incredibly well priced for their performance and more than make it worthwhile to put up with their inconsistencies and potential cherry picking that may be required of people for such. The general longevity of these switches is unknown but hoped to be good given Wingtree's increasing popularity and foray into producing custom molds.

Other

Rough edges in mind, this is among the strongest “first custom molds” I’ve ever seen from a manufacturer and the Wingtree 277s may be the start of a massive come up for Wingtree...
