

## KTT Wine Red Pro

Last Update: 11/02/2025

KTT Wine Red Pro		
Switch Type: Linear		KTT
28	/35	Push Feel
18	/25	Wobble
6	/10	Sound
13	/20	Context
6	/10	Other
71	/100	<b>Total</b>

### Notes

#### **Push Feel**

The KTT Wine Red Pros, much like the many year old originals that inspired them, are light weight linear switches with a ~53 gf. bottom out and a nearly full, 3.8 mm stroke length. Unlike the originals, though, these have a fairly generous amount of factory lubing that while making the strokes smooth, does cause some housing collisions to feel squishy and inconsistent at faster typing speeds.

#### **Wobble**

There is a moderate, largely average overall amount of N/S and E/W direction stem wobble that is equal in magnitude in both directions for the KTT Wine Red Pro switches.

#### **Sound**

At normal actuation speeds, the KTT Wine Red Pros are incredibly quiet, having no substantial noise to them save for their firm, slightly pointed bottom outs. As actuation speeds pick up, though, inconsistencies in these tones and the appearance of an inconsistent 'sticky' sound that I assume is from the generous factory lubing does make these not quite as balanced as they may seem out of the box. The switches are otherwise free from scratch, ping, or any other strange noises you wouldn't expect of them.

#### **Context**

Ironically, much like the original KTT Wine Reds the Wine Red Pros are not nearly as widespread or popular as you would think despite their fairly cheap ~\$0.23-0.25 per switch price tag. At this point in time this is largely due to KTT having a much broader spectrum of competition in manufacturers that can directly compete not only with pricing but distribution. I imagine these may not stay around as long as many would hope for.

#### **Other**

While the market and community expectations have ballooned in recent years, the Wine Red Pros show that KTT's quality and manufacturing ability definitely have as well.
