

Wingtree x LICHICX Yamatake

Last Update: 05/10/2026

Wingtree x LICHICX Yamatake		
Type: Silent Tactile		Wingtree
30	/35	Push Feel
17	/25	Wobble
8	/10	Sound
14	/20	Context
7	/10	Other
76	/100	Total

Notes

Push Feel

The Wingtree x LICHICX Yamatake switches are ‘all around soft’ silent tactiles with a super short, soft, and centered mid-stroke tactile bump as well as a strongly dampened, but not mushy, feeling bottom out on account of using LICHICX’s iconic dampening method. Paired up with a fairly smooth and only lightly scratchy feeling stroke, the only real point against the feeling of these switches is that they do have some shift in their firmness at bottom out across different typing speeds.

Wobble

There is a surprisingly noticeable amount of stem wobble in the Yamatake silent tactiles. Noticeable more so in the N/S direction than the E/W direction, this may bother some users that are a bit picky about this metric.

Sound

Much like with the push feeling notes above there is hardly any sound that emanates from the Yamatake with the exception of a slightly squishy, dampened tone that arises under harsher typing speeds. Even the tactile bumps of these switches are near silent and without much, if any, of a snappy tone on account of their low overall strength.

Context

Priced around \$0.40 per switch and designed as an XLLAB-led LICHICX revival by Wingtree, who at least appears to be the proprietary owner of their molds now, these are among the best way to continue enjoying classic LICHICX dampening in the modern era. With a good spread of vendors stocking them and a solid lightly forceful tactile offering, these likely will remain noteworthy for some time.

Other

In addition to a unique contextual vibe through Wingtree’s continuation of LICHICX’s molds, these are notably among the lightest
