18	/25	Wobble
6	/10	Sound
16	/20	Context
4	/10	Other
72	/100	Total

Notes

Push Feel

Featuring a 3.500 mm-long stroke that ends in a medium-light, 55 gf. bottom out weight on the back of a long spring and a nylon-on-nylon collision, the main driver of the feeling in the Akko Creamy Yellow U1s are their rounded, occasionally snappy stem pole bottom outs. However, beyond this there's not much that really distinguishes these linears for better or for worse. They are generally smooth, but with some occasional small grain scratchiness, they bottom out as described, though mildly inconsistently from switch to switch, and just kind of are down the middle, as expected linears without many twists or flairs.

Wobble

Present more so in the N/S direction than the E/W direction, there is small, likely to be unproblematic amount of stem wobble in the Akko Creamy Yellow U1 switches that won't bother most users except those particularly picky about this metric.

Sound

The sound profile of the Creamy Yellow U1s is similar to the push feeling notes above insofar that it is driven by the soft, somewhat snappy stem pole bottom outs sometimes, occasionally is accented by subtle leathery scratch tones, and is altogether somewhat unremarkable. These quiet linears don't offer too much offensive and realistically could be suitable for any user.

Context

Priced at about as cheaply as you can price modern day switches at \$0.20 per switch, the subtle flaws and lack of standout character are almost hard to complain too much about in the Creamy Yellow U1s at this price point. Additionally, they have almost an almost guaranteed longer shelf life and wider community availability on account of Akko and their reputation with switches.

Other

While I can empathize that these were not made to take big strides or do anything other than fall in line with other Akko Creamy Yellow switches, these ultimately do just feel a bit... plain.
