

Unionwell Xueyao

Last Update: 07/26/2026

Unionwell Xueyao		
Switch Type: Linear		Greetech
32	/35	Push Feel
21	/25	Wobble
7	/10	Sound
10	/20	Context
5	/10	Other
75	/100	Total

Notes

Push Feel

While the Unionwell Xueyao, otherwise known as Snow Shine, switches will certainly be divisive among magnetic switch enthusiasts, its only because they so cleanly and singularly focus in on one niche – linearity with sharp, pointed exclamation points for housing collisions. The switches are nearly perfectly smooth with just the right amount of factory lubing that really only focuses attention onto their singular, pointed POM-on-POM bottom outs that are quite firm and resounding yet still soft and not overly cumbersome to type on repeatedly.

Wobble

There is a small amount of N/S and E/W direction stem wobble on the Xueyao switches that is not likely to bother most enthusiasts, except the ones who are a bit picky about such.

Sound

The Unionwell Xueyao switches are medium-high pitched, loud linear switches with a sound profile that is almost exclusively the function of the POM-on-POM stem and bottom housing collision at the end of the stroke and is even strong enough to almost override their push feeling. The sound is rounded with a touch of sharpness but is perfectly clear, focused, and without fuzz or much change across typing speeds. The only real issue here is that some switches are noticeably a bit deeper and more bass-y than others.

Context

While Unionwell as a brand has pushed out a lot of HE style switches in the last couple of years all over the price range, I'm just not sure these are physically worth the approximately \$1 per switch price tag I see them frequently listed at. It's certainly a novel experience relative to mechanical switches, but this kind of singular sharpness is much more common in HE switches.

Other

Potential financial justification aside, these switches do also deserve some credit for their neat two-sided, in-built LED diffuser design. I can't recall having seen these on HE switches before.
